

```
#include<stdio.h>
#include<conio.h>

void main()
{
    int w, l, a;
    clrscr();
    printf("\nenter Width :");
    scanf("%d", &w);
    printf("\nenter Length :");
    scanf("%d", &l);
    printf("\nWidth :- %d \nLength :- %d", w, l);
    a = w * l;
    printf("\nArea of a Rectangle :- %d", a);
    getch();
}
```

OUTPUT:-

```
enter Width :3

enter Length :4

Width :- 3
Length :- 4
Area of a Rectangle :- 12
```
