

```
#include<stdio.h>
#include<conio.h>
void main()
{
    int a, A;
    clrscr();
    printf("\nenter a side:");
    scanf("%d", &a);
    A = a * a;
    printf("\nA = %d", A);
    getch();
}
```

OUTPUT:-

```
enter a side:5
```

```
A = 25_
```
