

```
#include<stdio.h>
#include<conio.h>
void main()
{
    int a, b;
    clrscr();
    printf("\nenter value of a:");
    scanf("%d", &a);
    printf("\nenter value of b:");
    scanf("%d", &b);
    printf("\nvalue of a is %d",a);
    printf("\nvalue of b is %d",b);
    getch();
}
```

OUTPUT:

```
enter value of a:12

enter value of b:21

value of a is 12
value of b is 21
```
