

```
#include<stdio.h>
#include<conio.h>
void main()
{
    float cm, i, f;
    clrscr();
    printf("\nEnter cm:");
    scanf("%f",&cm);
    clrscr();
    i = cm / 2.5;
    f = i / 12;
    printf("\ncm = %.2f",cm);
    printf("\ninch = %.2f",i);
    printf("\nfoot = %.2f",f);
    getch();
}
```

OUTPUT:-

```
cm = 150.00
inch = 60.00
foot = 5.00_
```
