

```
#include<stdio.h>
#include<conio.h>

void main()
{
    float p, r, n, i;
    clrscr();
    printf("\nP:");
    scanf("%f", &p);
    printf("\nR:");
    scanf("%f", &r);
    printf("\nN:");
    scanf("%f", &n);
    i = p * r * n / 100;
    printf("\n\nsimple intrest:%.2f", i);
    getch();
}
```

OUTPUT:-

```
P:10000
R:12
N:2

simple intrest:2400.00_
```
