```c
#include<stdio.h>
#include<conio.h>
void main()
{
    int a, b;
    clrscr();
    printf("\nenter number1:");
    scanf("%d", &a);
    printf("\nenter number2:");
    scanf("%d", &b);
    printf("\n%d-%d=%d",a,b,a-b);
    getch();
}
```

OUTPUT:-

```
enter number1:15

enter number2:7

15-7=8_
```
